Software Developer

JTL-Innovation, Research & Development-SD-11-24 | Management & Business Development | Contract | Posted on December 21st, 2024 | Expires on December 20th, 2024

We're seeking an experienced software developer who will be responsible for building software by writing code, as well as modifying software to fix errors, adapt it to new hardware, improve its performance, or upgrade interfaces. They will also be involved in directing system testing and validation procedures, as well as working with departments on technical issues including software system design and maintenance.

SOFTWARE DEVELOPER JOB RESPONSIBILITIES

• Collaborate with team members to determine best practices and client requirements for software

• Develop intuitive software that meets and exceeds the needs of the company

• Professionally maintain all software and create updates regularly to address customer and company concerns

• Analyze and test programs and products before formal launch

• Troubleshoot coding problems quickly and efficiently to ensure a productive workplace

• Ensure software security by developing programs to actively monitor the sharing of private information

• Actively seek ways to improve business software processes and interactions

• Aid and support the coaching and training of other team members to ensure all employees are confident in the use of software applications

QUALIFICATIONS FOR SOFTWARE DEVELOPER JOB

• A bachelor's degree in computer science is preferable

• At least 3 years' experience in software development is mandatory

• A functional understanding of common frameworks such as Java, Python, PHP, etc.

• Knowledge of CSS, HTML and JavaScript is essential

• Software development certifications is desirable

• Ability to communicate and collaborate with both internal clients and others on the creative team is essential

• Ability to think and problem-solve innovatively is a must
